NIGHT VISION VIDEO RENTAL

Camcorder – dSLR HD Movie Night Vision Capability

The PNP XD4 Night Vision Scope with 64/lm Image Intensifier Tube is designed for extreme low-light, high resolution image capture with camcorders & dSLR HD movie kits.

The PNP is perfectly suited for 'close quarters' imaging where an ENG camera is just too big & bulky!

The PNP is simply screwed onto the front of the camcorder and either a 'C' mount zoom lens (provided) is used as the objective lens, or otherwise with the use of a 'C' mount to Nikon or Canon EOS adaptor, the operator is able to use Nikon or Canon EOS lenses on the front of the night intensified camcorder.

Supplied with an Optical Module, allows the operator to seamlessly & effortlessly mount the PNP on Nikon & Canon EOS dSLR bodies without the necessity of having to pre-focus the camera lens & adjusting the zoom. On cameras with nominal 24mm x 16mm or 36 x 24mm APSC or FF chips, dependant upon camera body, vignetting of the image may additionally be eliminated.

The PNP XD4 Night Vision Device is utilised extensively by the Australian Media for domestic & overseas assignments

as well as by production houses.

PNP Night Vision Device ex GST	
24hrs	\$ 450.00
7 days	\$2,100.00
14 days	\$4,160.00
21 days	\$5,850.00
28 days	\$7,780.00
29 days +	by negotiation

Military & Law Enforcement Technologies holds UK Ministry of Defence & Australian Department of Defence; Defence Export & Control Organisation export permits for all Australian Media, allowing us to provide you expedited PNP rentals for overseas assignments at short notice.
